

Staff Immunisation Policy

Policy Statement

Staff immunisation and associated health issues are considerations of Work, Health and Safety practice within our preschool. Staff members who work in an early childhood education and care service are at increased risk of contracting certain infectious illnesses. Immunisation is a simple, safe and effective way of protecting people against harmful diseases.

Policy Goals

Staff and educators will be fully informed on immunisation and associated diseases. A voluntary staff immunisation record will be maintained at the preschool. As of 8th November 2021, all staff at Tathra Preschool are required to have received two doses of COVID-19 vaccination as per NSW Department of Health mandate, unless they have been issued with a medical contraindication certificate.

Strategies; How will it be done?

How COVID-19 vaccines work

The COVID-19 vaccines will help protect people by either preventing or reducing symptoms of COVID-19 in the person who has received the vaccine.

At this stage it is too early to tell if the COVID-19 vaccines will stop a vaccinated person from being infected with the virus. This means that a vaccinated person may unknowingly carry and spread the virus to others around them, including workers and others in their workplace. For this reason, you must continue to apply all reasonably practicable [control measures](#). For more information on how the COVID-19 vaccines work, go to the [Department of Health website](#).

Managing vaccinations in the workplace

The Public Health Orders (PHO) place obligations on workers in areas where mandatory vaccination is required, not employers. However, as an employer of a relevant worker, you are able to request evidence of compliance with the PHO when the worker enters their place of work.

The following people may request evidence of vaccination status:

- the worker's employer
- the occupier of the workers place of work
- a police officer officer
- an authorised person (under the Public Health Act 2010).

Where requested, a worker must show:

- evidence of their name and place of residence,
- regarding proof the vaccination itself:
- an online immunisation history statement or
- a COVID-19 digital certificate from the Australian Immunisation Register, or
- a medical certificate from a medical practitioner in the form approved by the NSW Chief Health Officer.

COVID vaccination claims scheme

COVID-19 vaccines approved for use in Australia are safe and effective. There are strict requirements for testing and approving vaccines. Clinical trials must provide scientific evidence which demonstrates that the benefits of a vaccine greatly outweigh any risks. The

Therapeutic Goods Administration, or the TGA, has been rigorously assessing the potential COVID-19 vaccines for safety, quality and effectiveness.

Adverse reactions are extremely rare, however, to address community concern, the Australian Government is developing a claims scheme to reimburse people who suffer a moderate to significant impact following an adverse reaction to an approved COVID-19 vaccine.

Roles and Responsibilities

The Nominated Supervisor will:

Upon employment:

Staff/educators are informed of infectious diseases that may be contracted when working with children. Information will be provided on mandated compulsory and recommended adult immunisation and vaccines for preventable diseases (see reference list) as part of induction procedures for new staff, students and volunteers.

Staff/educators are advised to discuss with their doctor what precautions can be taken to minimise/prevent the risk of contracting infectious diseases. This is particularly important for women of childbearing age. Any female staff planning to become pregnant should consult their doctor about specific immunisation needs.

Throughout employment of staff and educators: -

- A voluntary up-to-date Staff Immunisation record will be maintained. The information contained within the record will be kept confidential and only used for the purpose of maintaining a safe workplace. It will not be shared with any other agency. Staff/educators are encouraged to volunteer information regarding immunisation status however this is not compulsory under legislation.

- If a vaccine preventable disease occurs in the centre and a staff member is not immunised, the staff member is encouraged to inform the Director. Non immunised staff should consult their doctor to determine suitability to attend work during the outbreak.
- Follow recommendations and advice from a doctor regarding a decision to proceed with appropriate vaccination.
- Inform the nominated supervisor/coordinator as soon as possible if they are pregnant, and follow procedures as outlined in Tathra preschool’s Work Health and Safety Policy.
- Continue to minimise their risk of exposure to infectious diseases by adhering to Tathra Preschool Work, Health and Safety Policies. All educators and staff are responsible for following the Health and Hygiene procedures and practices to minimise the risk of spreading infection. Educators/staff must take responsibility for following all hygiene policies and procedures outlined in the service policy manual and the Australian Government publication, Staying Healthy in Child Care.

NHMRC Recommendations for vaccinations of educators working with children

Occupation	Disease/Vaccine
All those working with children which includes educators, students and volunteers.	Boostrix: (Adult Diphtheria Tetanus and pertussis Vaccine) MMR (if non-immune) Varicella (if seronegative) is recommended if you have not had chicken pox or shingles in the past. Hepatitis A Vaccine and Hepatitis B vaccine

Monitor, Evaluation and Review

This policy will be monitored to ensure compliance with legislative requirements and unless deemed necessary through the identification of practice gaps, the service will review this Policy every two years.

Families and staff are essential stakeholders in the policy review process and will be given opportunity and encouragement to be actively involved.

In accordance with R. 172 of the Education and Care Services National Regulations, the service will ensure that families of children enrolled at the service are notified at least 14 days before making any change to a policy or procedure that may have significant impact on the provision of education and care to any child enrolled at the Preschool; a family's ability to utilise the service; the fees charged or the way in which fees are collected.
